

GANGWAYS

PRODUCT GUIDE

Product Highlights

Over 35 years experience in design, fabrication, transportation and installation of quality gangways

Fabricated from marine grade aluminium to suit required specifications

Available in lengths from 1 metre to over 60 metres long

All gangways are designed to ensure a safe, reliable, and compliant access solution

Custom designed for light domestic usage through to heavy duty industrial applications

Durable and designed for resistance to the harsh marine and challenging industrial environments

Features & Benefits

All gangways adhere to strict Australian standards and can either be fixed or adjustable to accommodate varying water levels and vessel heights

World class fabrication with the best available equipment and products including water cooled Fronius Welders and Safra Welding Alloy

Extra strength & durability: quality welders eliminate dressing, machining or grinding of finished welds

Specifically designed extrusions and in-house shop drawing development

A broad range of protective coatings and flooring options are available including the award-winning, Australian made Superior Eco Tile.

Popular accessories include handrails, kickrails, hinge and roller systems, transition plates, gates and lighting.
